Table of Contents
Volume 1

Day 1 – Monday, September 27, 2004

Plenary I
SINGLE MOLECULE NANO-BIOSCIENCE ........................................................................... 1
Toshiyuki Yanagida
Osaka University

Monday Session A – Particle Sorting
HIGH-SPEED PARTICLE SORTING: COMBINING DIELECTROPHORESIS AND FLUID FLOW .................................................................................................................. 6
David Holmes, Mairi E. Sandison, Nicolas G. Green and Hywel Morgan
University of Southampton

CONTINUOUS PARTICLE SEPARATOR BASED ON PERIODICAL DEP ELEMENTS ................................................................................................................................. 9
Stefan Kostner¹, Jeroen H. Nieuwenhuis², Edeltraud Svasek³, Peter Svasek³, Arthur Jachimowicz⁴ and Michiel J. Vellekoop⁵
¹ Vienna University of Technology, ²Ludwig Boltzmann Institute of Biomedical Microtechnology, Vienna

STUDY OF HIGH SPEED ACOUSTIC SEPARATION IN MICRO-CHANNELS
USING µ-PIV ..................................................................................................................... 12
Holden Li, Vinip Vitsikate, Thomas W. Kenny
Stanford University

Monday Session B – Motormolecules
UNIDIRECTIONAL TRANSPORTATION OF NANO BEADS BY KINESIN ON MICROTUBULES WELL-ORIENTED IN A MICRO CHANNEL ........................................... 15
Ryui Yokokawa¹, Shoji Takeuchi¹, Takahide Kon¹, Masaya Nishiura¹, Kazuo Sato¹, Hironuki Fujita¹
¹CIRMM/ICS, ²Graduate School of Arts and Sciences, The University of Tokyo

NANOSCALE TRANSPORT AND ASSEMBLY WITH MOTOR PROTEINS AND MICROTUBULES .............................................................................................................. 18
J. M. Bauer¹, A. K. Boal¹, S. B. Rivera¹, R. G. Manley¹, G. D. Bachand², J. Liu¹,
R. P. Manginell³, B. C. Bunker²
¹Micro Analytical Systems, ²Biomolecular Materials and Interfaces, ³Chemical Synthesis and Nanomaterials, Sandia National Laboratories
WINDING UP SINGLE F_{1}-MOTOR PROTEIN IN FEMTOLITER CHAMBERS: THE MOLECULAR PULL-BACK CAR. .................................................................................................................. 21
Y. Rondelez^{1}, G. Tresset^{1}, Y. Kato-Yamada^{1}, H. Fujita^{1}, S. Takeuchi^{2}, H. Noji^{2}
^{1} LIMMS/CNRS-IIS, ^{2} IIS, The University of Tokyo

Monday Session A – Cell Positioning
POSITIONING OF CELLS IN MICROSTRUCTURE AND EXTRACTION OF CONTINUOUS DNA FIBERS FROM INDIVIDUAL CELLS ........................................................................ 24
Kyohi Terao^{1}, Hiroaki Kabata^{1} and Masao Washizu^{1}
^{1} The University of Tokyo, ^{2} Kyoto University

UTILIZATION OF CELL-SIZED LIPID CONTAINERS FOR NANOSTRUCTURE AND SINGLE MOLECULE MANIPULATION ........................................................................ 27
Guillaume Tresset^{1} and Shoji Takeuchi^{2}
^{1} LIMMS/CNRS-IIS, ^{2} CIRM/NI, The University of Tokyo

DEVELOPMENT OF INDIVIDUAL CELL SORTING SYSTEM FOR INTERCELLULAR REACTION ANALYSIS ................................................................................................. 30
Shin-ichi Otsuka^{1}, Masaki Kanai^{1}^{2}, Masahiro Hayashi^{1}, Hiroaki Nakanishi^{1} and Shuichi Shoji^{1}
^{1} Waseda University, ^{2} Shimadzu Corporation

Monday Session B – MEMS
CAPILLARY-ASSEMBLED MICROCHIP (CAS-CHIP): A NEW METHOD FOR INTEGRATING MULTIPLE CHEMICAL FUNCTIONS ONTO A SINGLE MICROFLUIDIC DEVICE ................................................................ 33
Hideaki Hisamote^{1}, Yuji Nakashima^{1}, Chihiro Kitamori^{1}, Shun-ichi Funano^{1}, Midori Yasuoka^{1}, Keisuke Morishima^{2}, Yoshikuni Kikutani^{1}, Takehiko Kitamori^{1,2,3}, and Shigeru Terabe^{1}
^{1} University of Hyogo, ^{2} Kanagawa Academy of Science and Technology, ^{3} The University of Tokyo

ACTIVE ASSEMBLY METHODS FOR MICROFLUIDIC SYSTEMS ........................................ 36
Dongshin Xim^{1}, Sowmintra K. Mohanty^{2} and David J. Feebe^{2,3}
^{1} Department of Mechanical Engineering, ^{2} Department of Biomedical Engineering, University of Wisconsin

SINGLE-MASK STEP INTEGRATION OF HIGH-ASPECT RATIO SUB-MICROMETER CHANNELS, PURE SILICA WAVEGUIDES AND FIBER COUPLERS FOR SEPARATION CHIPS ........................................................................ 39
Klaus B. Mogensen, Fredrik Eriksson, Rikke P. H. Nikolajsen, Omar Gustafsson and Jörg P. Kutter
Technical University of Denmark
Monday Plenary II
THREADING PEPTIDES AND PROTEINS INTO DISEASE SURVEILLANCE STRATEGIES – LINKING TO MICROTECHNOLOGY INTEGRATION ............................................. 42
György Marko-Varga
AstraZeneca R&D Lund

Monday Poster Sessions – Applications I
A SELF-CONTAINED, DISPOSABLE CARTRIDGE CONCEPT FOR COMPLETE BLOOD COUNTS ........................................................................................................ 46
Ulrik Darling Larsen1, Björn Arthur Ekberg1, Martin Jensen2
1Chempaq A/S, Copenhagen, 2Danish Technological Institute

ON-CHIP FREE-FLOW MAGNETOPHORESIS – SEPARATION AND DETECTION OF MIXTURES OF MAGNETIC PARTICLES IN CONTINUOUS FLOW ...................................................................................................................... 49
Nicole Papenfuss2,3 and Andreas Manz1,3
1Imperial College London, 2current address: NIMS, ICYS, Tsukuba, 3current address: ISAS, Dortmund

A NOVEL APPROACH FOR MINIATURIZED IN VITRO PROTEIN EXPRESSION IN MICROFLUIDIC CHANNELS ......................................................................................... 42
Petra S. Dittrich1,2, Michael Jahnz3 and Petra Schwille1,2
1Institute for Analytical Sciences, Dortmund, 2Dresden University of Technology,
3Work performed in the Experimental Biophysics Group, Max Planck-Institute for Biophysical Chemistry

IMPEDANCE SPECTROSCOPY FLOW CYTOMETRY: PARAMETERS FOR LABEL-FREE CELL DIFFERENTIATION ......................................................................................... 55
Karen Cheung, Shady Gawad and Philippe Renaud
EPFL, Lausanne

IMPEDANCE SPECTROSCOPY FLOW CYTOMETRY: MODEL VALIDATION ............................................................................................................................... 58
Shady Gawad, Karen Cheung and Philippe Renaud
EPFL, Lausanne

MULTIPLEXED MICROFLUIDIC DEVICES FOR SINGLE-CELL MANIPULATION AND ANALYSIS ............................................................................................................. 61
S. Ramachandra Rao1,2, Shohei Yamamura1,2, Yuzuru Takamura2 and Zitichi Tanaka2
1Toyama New Industry Organization, 2Japan Advanced Institute of Science and Technology
EVALUATION OF CELL ELECTROPHORETIC MOBILITY USING MICROCAPILLARY ELECTROPHORESIS CHIPS ................................................................. 64
Fumihito Omatsu1, Yuta Nakano2 and Takanori Ichikawa3
1PRESTO, Japan Science and Technology Agency, 2Toyo University,
3The University of Tokyo

APPLICATION OF THERMAL LENS MICROSCOPY AND ON-LINE SAMPLE PRECONCENTRATION FOR HIGH SENSITIVE DETECTION IN MICROCHIP ELECTROPHORESIS ........................................................................................................ 67
Fumihiko Kitagawa1, Kenji Sueyoshi2, Jun Mizuno2, Yasuo Wada3, Shuichi Shoji1 and
Koji Otsuka
1Kyoto University, 2Nanotechnology Research Laboratory, 3Department of Electrical
Engineering and Bioscience, Waseda University

DEVELOPMENT OF A NOVEL IMMUNOSENSOR BASED ON MICROCHIP ZONE ELECTROPHORESIS ........................................................................... 70
Koutarou Idegami1, Masaaki Kobayashi1, Yuzuru Takamura2 and Eiichi Tamiya2
1Ishikawa Sunrise Industries Creation Organization, 2Japan Advanced Institute of
Science and Technology

ON CHIP CAPILLARY ELECTROCHROMATOGRAPHY: STUDY OF A STRONG CATION-EXCHANGE PHASE ................................................................. 72
Dolores Martinez and D. Jed Harrison
University of Alberta

LOCALISED STIMULATION OF SLIME MOULD USING MICROFLUIDIC DEVICES ........................................................................................................... 75
Sander Koster1, Tobias Kreis1, Akiko Takenawa2, Teruo Fujii1, Elisabeth Verpoorter2 and Nico de Rooij2
1University of Neuchâtel, 2Present address: Groningen Research Institute of
Pharmacy, 3Present address: ETH Zurich, 4The University of Tokyo, 5Present address:
Waseda University

HIGH-THROUGHPUT SCREENING AND ANALYSIS FOR ANTIGEN SPECIFIC SINGLE-CELL USING MICROARRAY ........................................................................ 78
Shohei Yamamura1, Sathuluri Ramachandra Rao1, Masahiro Omori2, Yoshinori Tokumitsu1, Sachiko Kondo2, Hiroki Koshi1, Atsushi Maruguchi1, Yuzuru Takamura2 and Eiichi Tamiya2
1Toyama New Industry Organization, 2Toyama Medical and Pharmaceutical
University, 3Japan Advanced Institute of Science and Technology

CONDUCTIVITY GRADIENT FOCUSING ................................................................................................................................. 81
Oscar G. Potter1, Rosanne M. Guijt2, Stuart Corney2, Paul R. Huddad2 and
Miroslav Macka1
1University of Tasmania, 2CSIRO Marine Research
DESIGNING MULTIFUNCTIONAL MICROCHIPS FOR ELECTROPHORETIC ANALYSIS

Kesji Sueyoshi1, Hidenori Nagai1, Shin-ichi Wakisaka2, Junji Nishii2, Fumihiko Kitagawa1 and Koji Otsuka1
1 Kyoto University, 2 National Institute of Advanced Industrial Science and Technology

MICRO REVERSE-TRANSCRIPTION POLYMERASE CHAIN REACTION SYSTEM FOR CLINICAL DIAGNOSIS

Chia-Sheng Liao1, Gwe-Bin Lee1,2, Hsiao-Sheng Lin1, Tsung-Min Hsieh1, Chih-Hao Wang1, Chu-Lin Fan1 and Hsing Luo1
1 Institute of MEMS Engineering, 2 Department of Engineering Science, National Cheng Kung University

THE EFFECT OF VELOCITY AND EXTENSIONAL STRAIN RATE ON ENHANCING DNA HYBRIDIZATION IN A MICROFLUIDIC CHIP

Yung-Chiang Chung1, Yu-Cheng Lin, and Yuh-Lih Hsu1
1 Industrial Technology Research Institute, Hsinchu, 2 National Cheng Kung University

PHOTOCATALYTIC PEGD-COMBINED SYNTHESIS WITH TiO2 FILM MODIFIED MICROCHANNEL

Go Takeda1, Takehiko Kitamori1,2 and Haeng-Boo Kim1,2
1 Department of Applied Chemistry, The University of Tokyo, 2 Kanagawa Academy of Science and Technology, 3 Engineering Research Institute, The University of Tokyo

ON-LINE MS DETECTION FOR A MULTI-STEP COMBINATORIAL SYNTHESIS SYSTEM

Ryo Sakai1, Yutaka Takahashi1, Katsunari Sakamoto1, Yoshikazu Yoshida1 and Takehiko Kitamori2
1 The Research Association of Micro Chemical Process Technology, 2 The University of Tokyo

MICRO ENVIRONMENTAL GAS ANALYSIS SYSTEM BY USING GAS-LIQUID TWO PHASE FLOW

Hiromitsu Hachijo1,2, Teruki Matsumoto1, Kazuteru Kanda1, Manabu Takeda1, Yoshikazu Yoshida1, and Takehiko Kitamori1,2
1 The Research Association of Micro Chemical Process Technology, 2 EKK-TOA Corporation, 3 Kanagawa Academy of Science and Technology, 4 The University of Tokyo

CONTINUOUS-FLOW MICROMIXING FOR FAST DNA HYBRIDISATION ASSAYS

Martin Jeele1,2 and Andreas Manz1,3
1 Imperial College London, 2 Microsystems Laboratory, STI-LMIS, EPFL, 3 ISAS, Institute of Analytical Sciences, Dortmund

8th International Conference on Miniaturized Systems for Chemistry and Life Sciences
September 26–30, 2004, Malmö, Sweden

xv
THE USE OF SOLID-SUPPORTED REAGENTS WITHIN EOF-BASED MICRO REACTORS .................................................. 105
Charlotte Wiles, Paul Watts and Stephen J. Haswell
The University of Hull

A DIELECTROPHORETIC CELL SEPARATION MICROCHIP WITH SIZE FILTERING .................................................. 108
Tsan-I Chen and Cheng-Hsien Liu
National Tsing-Hua University

ON-CHIP SPERMATOZOA TRAPPING BY DIELECTROPHORESIS................................................. 111
M. Fréneé1, M. Chiral1, B. Le Piochle, N. Melaine2, C. Pineau1 and B. Jégou2
1SATIE UMR 8029 CNRS - BIOMIS, 2 University of Rennes

OPTICAL MICROORGANISM CHARACTERIZATION IN POLYMERIC CONFIGURABLE MICROFLUIDIC CHIPS .................................................. 114
Andres M. Cardenas-Valencia, David Fries and Xiaolin Ding
University of South Florida

AN INTEGRATED MICRODEVICE FOR ON-CHIP PRECONCENTRATION, SEPARATION AND LABELING OF PROTEINS .................................................. 117
Daria Petersen1, Robert S. Foote2, Oliver Gesche2 and J. Michael Ramsey2
1 University of North Carolina, 2 Oak Ridge National Laboratory, 3 Technical University of Denmark

INTERCHANNEL MICROSTRUCTURE FOR SEPARATION AND ANALYSES OF PLASMA FROM WHOLE BLOOD .................................................. 120
XiaoHai Yang1, Atsuhide Hihara1, Kiichi Sato1, Manabu Tokeshi1, Keisuke Morishima1, YoshiKuni Kikutani2, Hiroko Kimura1 and Takehiko Kitamori1,2
1 The University of Tokyo, 2 Kanagawa Academy of Science and Technology (KAST), 1 Juntendo University

A CELL-BASED ASSAY FOR RAPID CHEMICAL SCREENING .................................................. 123
Pak Kin Wong1, Wilson WaiChun Wong2, James C. Liao2 and Chih-Ming Ho1
1 Department of Mechanical & Aerospace Engineering, 2 Department of Chemical Engineering, University of California, Los Angeles

A MULTI CELULAR DIAGNOSTIC DEVICE FOR HIGH-THROUGHPUT ANALYSIS .................................................. 126
Masaki Kanai1,2, Tatsuya Minakata1, Hirohisa Abe1, Yoichi Fujiyama2, Daisuke Uchida2, Hiromi Mikado2, Hiroaki Nakamichi1 and Shinichi Shoji2
1 Shimadzu Corporation, 2 Waseda University

THE AGGREGATION OF MULTIVALENT IMMUNE COMPLEXES EXPANDS THE USEFUL ANALYTE SIZE RANGE OF THE DIFFUSION IMMUNOASSAY ............ 129
Kenneth R. Hawkins and Paul Yager
University of Washington
LOW ABUNDANT BIOMARKER SCREENING IN POLY(METHYL-METHACRYLATE) HIGH ASPECT RATIO MICROSTRUCTURES USING IMMUNOAFFINITY-BASED MOLECULAR RECOGNITION ......................................................... 132
André A. Adams1, Juan Feng1, Michael C. Murphy1 and Steven A. Soper1
1Louisiana State University, Department of Chemistry, 2Louisiana State University, Department of Mechanical Engineering

AUTOMATED MICRO ELISA SYSTEM TOWARD CLINICAL DIAGNOSIS;
DETERMINATION OF A HEART FAILURE MARKER, BNP ........................................... 135
Kichi Sato1,2,3, Emi Morii1, Masaya Kakuta1, Munabu Tokeshi2 and Takehiko Kitamura2,4,5
1Department of Applied Biological Chemistry, The University of Tokyo, 2Kanagawa Academy of Science and Technology (KAST), 3Core Research for Evolutional Science and Technology 4Institute of Microchemical Technology (IMT), 5Department of Applied Chemistry, The University of Tokyo

ULTRA RAPID ALLERGEN ASSAY BY INTEGRATED ELISA SYSTEM ......................... 138
Toshinori Ohashi1, Yoshinori Matsunaka1, Yoshikazu Yoshida1 and Takehiko Kitamori1
1The Research Association of Micro Chemical Process Technology (MCPT),
2The University of Tokyo

OBSERVATION OF THE INTERACTION BETWEEN SINGLE DNA AND
INDIVIDUAL ENZYME MOLECULES IN A MICROCHIP ......................................... 141
Fuqian Deng1, Yoshikisa Yamaoka1, Tokugiro Nishimoto2, Hroudi Nakanishi1, Mitsu Ishikawa1 and Yoshinobu Baba1,2,3
1Single-Molecule Bioanalysis Laboratory, AIST, 2Shimadzu Corporation,
3The University of Tokushima

ON-CHIP SORTING SYSTEM USING CHARGED DROPLETS .................................... 144
Takashi Kawano1, Naritoshi Kanai1, Shinji Ando1, Masanori Yamamoto1, Jun Fujitawa1, Toru Torii1 and Yoshiro Higuchi1
1AISIN COSMOS R&D Co., Ltd. 2The University of Tokyo

CELLULAR CHEMOTAXIS OBSERVATION IN MICRODEVICES ........................... 147
Yasuhiro Goshik1, Naoki Oguro1, Takaaki Kurosawa1, Nao Nitta1, Shiro Kanegasaki1 and Teruo Fujii1
1Yamatake Corporation, 2Effector Cell Institute in RCAST, 3Institute of Industrial Science, The University of Tokyo

A RAPID POLYMERASE CHAIN REACTION SYSTEM
(GenSpecter® Micro PCR) FOR HEPATITIS B VIRUS DNA DETECTION .................... 150
Kwang W. Oh, Yoon-Kyoung Cho, Jinhee Kim, Sunyeon Kim, Kyoeong-Sik Ock, Kak Namsong, Kyutae Yoo, Chinsung Park, Youngsun Lee, Young-A Kim, Jungmin Han, Hyeokwon Lim, Jaejeong Kim, Daesung Yoon, Geubae Lim, Sanghyo (Sam) Kim, Jung-Joo Hwang and Y. Eugene Park
Samsung Advanced Institute of Technology
DEVELOPMENT OF THE IMMUNOASSAY WAVEGUIDE SENSOR CHIP FOR DIOXIN MEASUREMENT ......................................................... 153
Takashi Katayama1, Yoshikazu Yoshida1, Norio Tateishi2, Kenji Kawaguchi2 and Takehiko Kitamori3
1The Research Association of Micro Chemical Process Technology, 2 The University of Tokyo

DEVELOPMENT OF NOVEL MICRO MIXER AND ITS APPLICATION TO ζ-IMMUNOMAGNETIC CELL SORTER .......................................................... 156
Wei-Hsueng Tan1, Yuji Suzuki, Nobuhiko Kasagi, Naoki Shikazono, Katsuko Furukawa, and Takashi Ushida2
1Department of Mechanical Engineering, 2Center for Disease Biology and Integrative Medicine, The University of Tokyo

SINGLE-STEP CONCENTRATION AND SEQUENCE-SPECIFIC SEPARATION OF DNA BY AFFINITY MICROCHIP ELECTROPHORESIS .............................................. 159
Toshiyuki Ito, Akira Inoue, Kae Sato, Kazuo Hosokawa and Mizuo Maeda
RIKEN (The Institute of Physical and Chemical Research)

PACKED CHANNEL HPLC ON MICROCHIPS ................................................................................................. 162
Kazuharu Ohtsu1, Manabu Tokeshi1, Yoshikazu Yoshida1 and Takehiko Kitamori2
1Kanagawa Central Laboratory, 2 The University of Tokyo

AN INTEGRATABLE CONCAVE AND CONVEX MICROLENS USING SECTIONAL EXPOSURE OF SU-8 ................................................................................. 165
Hui Yu, Biao Li and Xin Zhang
Boston University

Monday Poster Session – Microfluidics I
DROPLET ACTUATION BASED ON SINGLE-PHASE ELECTROSTATIC EXCITATION ........................................................................................................ 168
Masahide Gunji1, Hiroaki Nakamichi2 and Masao Washizu2
1The University of Tokyo, 2 Shimadzu Corporation

ONE TOUCH FLUIDIC TUBE CONNECTOR FOR MICRO FLUIDIC DEVICES ........................................... 171
Keisuke Morishima1,2, Yoshikazu Yoshida1 and Takehiko Kitamori1,3
1Kanagawa Academy of Science and Technology, 2 The Research Association of Micro Chemical Process Technology, 3 The University of Tokyo

MODELING, ANALYSIS AND DESIGN OF CENTRIFUGAL FORCE DRIVEN TRANSIENT FILLING FLOW INTO CIRCULAR MICROCHANNEL ........................................................................... 174
Dong Sung Kim and Tai Han Kwon
Pohang University of Science and Technology
ELECTROKINETICALLY-DRIVEN ACTIVE MICRO-MIXERS AND ITS APPLICATION FOR DNA AMPLIFICATION .................................................. 177
Chia-Yen Lee, Ji-Lung Lin, Kuo-Hoong Lee and Gwo-Bin Lee
National Cheng Kung University

FLEXIBLE PARYLENE NEURAL PROBES WITH INTEGRATED MICROFLUIDIC CHANNELS .................................................................. 180
Dominik Ziegler1, Tatsufumi Suzuki2 and Shoji Takeuchi3
1 Center for International Research on MicroMechatronics, 2 Department of Information Physics & Computing, The University of Tokyo

A MICROSYSTEM FOR ON-LINE MONITORING OF BIO PROCESSES .......... 183
Ralph Wilke and Stephanus Bittrgenbach
Technical University of Braunschweig

AN ACCURATE VELOCITY PROFILE MEASUREMENT SYSTEM FOR MICROFLUIDICS - A DIRECT MEASUREMENT OF THE SLIP LENGTH .............. 186
Pierre Joseph, Patrick Tabeling
Microfluidique, MEMS et Nanostructures, ESPCI

CHAOTIC MIXING AND EXTRACTION, IN A MICROCHANNEL INTERSECTION ...... 189
Arash Dodge1, Anna Hountondji1, Marie-Caroline Jullion1 and Patrick Tabeling1
1 Microfluidics Laboratory, ESPCI, 2 BIOMIS, Satie

ELECTRO OSMOTICALLY CONTROLABLE MULTIFLOW MICROREACTOR .......... 192
Dietrich Kohlheyer, Rob G. H. Lommerink, Stefan Schlaatmann, Geert A. J. Besselink and Richard B. M. Schaufoort
University of Twente

MICROFLUIDIC CHIP-BASED FLOW-INJECTION ANALYSIS WITH HIGH THROUGHPUT SAMPLING INTERFACE .......................................................... 195
Qun Fang, Wen-Bin Du, Qiao-Hong He and Zhao-Lun Fang
Zhejiang University

ENHANCED MICROFLUIDIC MIXING USING PLANAR CURVED CHANNEL GEOMETRIES .................................................................................... 198
Arjun P. Sudarasan and Victor M. Ugaz
Texas A&M University

ELECTROKINETIC MICROMIXER UTILIZING NOVEL PINCHED-SWITCHING TECHNIQUE ............................................................................. 201
Che-Hsin Lin1, Lung-Ming Fu2 and Yu-Sheng Chien1
1 National Sun Yat-sen University, 2 National Pingtung University of Science and Technology
ORGANIC SYNTHETIC REACTIONS IN SUPERCOOLING FLOW USING MICROCHANNELS ................................................................. 204
Shinya Matsuoka¹, Masaharu Ueno¹,² and Takehiko Kitamori¹,²
¹ The University of Tokyo, ² Kanagawa Academy of Science and Technology

IN CHANNEL MIXING OF ON-DEMAND MICRODROPLETS GENERATED BY D.C. VOLTAGES ........................................................................... 207
A. Macaskill, P. R. Fielden, N. J. Goddard, S. Mohr and B.J. Treves Brown
University of Manchester Institute of Science and Technology

MONOLITHIC MICROCHEMICAL PROCESS PLANT OF IMMISCIBLE MICROFLUIDS ......................................................................................... 210
Jeung Sang Go¹,², Eun Ho Jeong¹, Takahiro Arakawa¹, Masahiro Mori¹, Kyung Chun Kim¹ and Shuichi Shoji¹
¹ Waseda University, ² Pusan National University

A STABLE TWO PHASE FLOW BY "SOMBRERO" CHANNEL .............................................................. 213
Katsumasa Sakamoto¹, Hiroaki Yakanishi¹, Manabu Tokeshi¹, Yoshihiko Yoshida¹ and Takehiko Kitamori¹
¹ Research Association of Micro Chemical Process Technology, Kanagawa, ² Shimadzu Corporation, ³ The University of Tokyo

LARGE CONCENTRATION CHANGES DUE TO THERMAL DIFFUSION EFFECTS IN GAS FLOW MICROSYSTEMS WITH TEMPERATURE GRADIENTS ................................................................. 216
U. J. Quaade¹, T. Johanassen¹, S. Jensen¹ and O. Hansen²
¹ Interdisciplinary Research Center for Catalysis (ICAT), ² MIC – Department of Micro- and Nanotechnology, Technical University of Denmark

NOVEL MEMBRANE DEVICES IN UNILATERAL CONFIGURATION .................................................. 219
Yuji Murakami¹,², Yoshihiko Yoshida¹ and Takehiko Kitamori¹
¹ Research Association of Micro Chemical Process Technology, ² Toray Industries, ³ The University of Tokyo

TOWARDS ON-CHIP SHEAR-DRIVEN CIRCULAR CHROMATOGRAPHY ........................................... 222
Xin Yang¹ and Andreas Manz²
¹ Imperial College London, ² ISAS Institute for Analytical Sciences, Dortmund

COMPARISON OF HYDRODYNAMIC VERSUS ELECTROOSMOTIC DRIVEN FLOWS FOR ENZYMATIC PROTEIN DIGESTION IN A MICROREACTOR ................................................................. 225
N. Surru², S. Bouffet¹, O. Constantin², J. Garin², F. Mittler², J. Sudor² and F. Viner²
¹ CEA Grenoble - DSV/DRDC, ² CEA-LETI Grenoble - DRT/DTBS
EXPERIMENTAL AND NUMERICAL STUDY OF KORTEWEG STRESS IN CONTINUOUS FLOW CHEMICAL PROCESSING ON MICROCHIP ........................................... 228
Yasuhiro Sugii1, Koji Okamoto2, Akhile Hibiira2, Manabu Tokeshi1 and Takehiko Kitanori1
1Department of Quantum Engineering and Systems Science, 2Department of Applied Chemistry, The University of Tokyo, 3 Kanagawa Academy of Science and Technology

COMPUTATIONAL ANALYSIS OF DOUBLE-T-TYPE MICROFLUIDIC MIXER USING PERIODIC ELECTROKINETIC FORCE .................................................. 231
Lung-Ming Fu1 Chia-Yen Lee1 and Che-Hsin Lin1
1National Pingtung University of Science and Technology, 2 Da-Yeh University,
3 National Sun Yat-sen University

HIGH-EFFICIENT MICROPUMP WITH GEOMETRY OPTIMIZATION OF MICROCHANNEL USING COMPUTATIONAL FLUID DYNAMICS ........................................... 234
Takaaki Suzuki1, Satoyuki Kawano2, Isaku Kanno1, Hirofumi Shintaka1,
Shusuke Yachiji1 and Hidetoshi Kotera1
1Kyoto University, 2 Tohoku University

LASER BASED ‘AIR BEADS’ CONTROL DEVICE .......................................................... 237
Yoshitaka Shiraishi1, Koichi Ono1 and Teruo Fujii1
1 Arbitec, Ltd., The University of Tokyo, 2 Enplas Laboratories, Inc., Saitama,
3 Institute of Industrial Science, The University of Tokyo

HYDRAULIC SAMPLE/REAGENT HANDLING SYSTEM FOR A DISPOSABLE CLINICAL DIAGNOSIS MICROCHIP .............................................................. 240
Ryuya Koyama1, Yoshikazu Yoshida1 and Takehiko Kitanori2
1 The Research Association of Micro Chemical Process Technology,
2 The University of Tokyo

A POWERLESS VAPOR-CONDENSATION AND DROPLET-COLLECTION/REMoval DEVICE FOR MICRO DIRECT METHANOL FUEL CELL ......................................................... 243
Fan-Gang Tseng, Shih-Jin Luo and Ching-Chang Chiang
National Tsing Hua University

GAS-LIQUID PHASE MICRO UNIT OPERATIONS USING TWO-PHASE FLOWS AND ITS APPLICATIONS FOR CHEMICAL PROCESS ........................................... 246
Manabu Tokeshi1, 2, Teruki Matsamoto1, Kazuteru Kanda1, Hiroimitsu Rachiya1,
Yoshikazu Yoshida1 and Takehiko Kitanori2, 3
1 The Research Association of Micro Chemical Process Technology, 2 Micro Chemistry Group, Kanagawa Academy of Science and Technology, 3 The University of Tokyo
A PRACTICAL WORLD TO CHIP INTERFACING FOR PDMS MICROCHIPS .................... 249
Mickie Harachi1, Masao Inoue1, Hisashi Hagiwara1 and Teroo Fujii2
1Arbiotec Ltd, The University of Tokyo, 2Institute of Industrial Science, The University of Tokyo

2D FREE SPACE FLOW CONTROL SYSTEM USING TERMOEVERSIBLE GELATION OF POLYMER BY IR-LASER ......................................................... 252
Masayasu Tatsuoka1, Tomohiro Shiono1, Yoshitaka Shirasaki1, Jun-ichi Tanaka2,
Shota Watabe2, Jun Mizuno1, Tomohiko Eda2, Ken Tsutsumi1, Yasuo Wada1,
Shuichi Shoji1, and Takashi Funatsu1
1Department of Physics, 2Department of Electrical Engineering and Bioscience,
The Institute of Nanotechnology, Waseda University

NANOSCALE STRUCTURE OF ELECTROKINETICALLY DRIVEN FLOW OBTAINED FROM LARGE-AREA EVANESCENT WAVE EXCITATION .................. 255
Koichiro Suki and Yohei Sato
Keio University

CONTROLLED PRODUCTION OF DOUBLE EMULSIONS USING MULTI-STEP DROPLET BREAK-UP ........................................................................... 258
Shingo Okashima, Takasi Nisitaka, Toru Torii and Toshiro Higuchi
The University of Tokyo

HIGH FLOW RATE MICROFLUIDIC PUMPS ........................................................................ 261
Jacques Goulpeau1,2, Daniel Trouche2 and Patrick Tabeling2
1Microfluidique, MEMS et Nanostructures, ESPCI, 2Bortia Technologies

RAMAN CONFOCAL IMAGING OF REACTION-DIFFUSION PROCESSES IN MICROCHANNELS ........................................................................ 264
Jean-Baptiste Salmon1, Laurent Servant2, David Yalaga2, Patrick Tabeling2 and
Mathieu Joanicot3
1Microfluidique, MEMS et Nanostructures, ESPCI, 2Université Bordeaux I,
3Lab Of the Future, Unité mixte Rhodia-CNRS, IECB

ON-CHIP COULTER COUNTER FOR AIRDUST MONITOR ..................................... 267
K. Miyamnrd1, Y. Yoshida1 and T. Kitamori1
1 The Research Association of Micro Chemical Process Technology Kanagawa Central Laboratory, 2The University of Tokyo

STUDY ON SATELLITE DROPLETS FORMATION IN A MEMS DIAPHRAGM
DRG EJECTOR ............................................................................................................ 270
National Center for High-performance Computing, Hsinchu

MICROCHIP FOR CONTINUOUS ON-LINE PCR PRODUCT ANALYSIS ............ 273
Hyerin Kim, Shinae Suk, Nokyoung Park and Jong Hoon Hahn
Pohang University of Science and Technology
SIMPLE BONDING OF PMMA MICROSTRUCTURES TO MODIFIED GLASS SURFACES PREPRINTED WITH DNA AND PROTEIN MICROARRAYS

Martin Dufva, Michael Stangegaard and Claus BV Christensen
Technical University of Denmark

DEVELOPMENT OF EFFECTIVE TRIPHASE REACTIONS USING MICROCHANNEL REACTORS

Juta Kobayashi1, Yuichiro Mori1, Masaharu Ueno1, Takehiko Kitamori1 and Shu Kobayashi1
1Graduate School of Pharmaceutical Sciences, 2Department of Applied Chemistry, The University of Tokyo

MANIPULATION AND PREPARATION OF BUBBLES FOR GAS ANALYSIS SYSTEMS

Takahiro Ito, Torii Toru and Toshiro Higurashi
The University of Tokyo

Monday Poster Session – Nanotechnology

BIOMOLECULE SEPARATION IN NANOFLUIDIC FILTERS BY STERIC HINDRANCE MECHANISM

Jianping Fu1 and Jongyoon Han2, 3
1Department of Mechanical Engineering, 2Department of Electrical Engineering and Computer Science, 3Biological Engineering Division, Massachusetts Institute of Technology

MOLECULAR VAPOR DEPOSITIONTM – A NEW TECHNIQUE FOR SURFACE MODIFICATION

Boris Kobrin1, Richard Yi1, Victor Fuentes1, S. Dasadhdi1, Roman W. Nowak1, Jeff Chinn1, Robert Ashurst1 and Roya Maboudian1
1Applied MicroStructures, Inc., San Jose, 2Auburn University, 3University of California at Berkeley

DYNAMIC PROPERTIES AND STRUCTURES OF WATER INSIDE THE HOLLOW CYLINDER OF A SUGAR-BASED LIPID NANOTUBES

Hirohatsu Uji1, 2, Guo Yanli2, Tsuguo Sawada1, Bo Yang1, Mitsutoshi Masuda1, 2 and Toshimi Shimaizu1, 2
1CREST, Japan Science and Technology Agency (JST), Tsukuba, 2The University of Tokyo, 3National Institute of Advanced Industrial Science and Technology (AIST)
UPTAKE OF QUANTUM DOTS INTO THE OSTEOBLAST CELLS UTILIZING ELECTROPORATION AND ENDOCYTOSIS .................................................. 294
Min Li¹, Yuan-Huang Lee¹, Yu-Cheng Lin¹, Yuh-Juan Lin², Shun-Tzu Chen¹ and Ching-Yi Wu²
¹Department of Engineering Science, ²Department of Cell Biology and Anatomy, National Cheng Kung University, ³Biomedical Engineering Center, ⁴Electronic Research and Service Organization, Industrial Technology Research Institute, Hsinchu

IMMUNOASSAY CHIP USING NANOPILLARS FABRICATED BY HIGH-ASPECT-RATIO NANOPRINT TECHNOLOGY .................................................. 297
Kazuko Kuwabara, Masahiko Ogino, Takashi Ando and Akihiro Miyaschi Hitachi Ltd

POTENTIOMETRIC DETECTION OF ALLELE SPECIFIC OLIGONUCLEOTIDE HYBRIDIZATION USING GENETIC FIELD EFFECT TRANSISTOR ................. 300
Toshiya Sakata and Yuji Miyahara National Institute for Materials Science, Tsukuba

DIRECT TRANSDUCTION OF PRIMER EXTENSION INTO ELECTRICAL SIGNAL USING GENETIC FIELD EFFECT TRANSISTOR .................................. 303
Yuji Miyahara and Toshiya Sakata National Institute for Materials Science, Tsukuba

FORMATION AND TRANSIENT PROCESS OF ELECTRIC DOUBLE LAYER BETWEEN ELECTROLYTE-GLASS INTERFACE MEASURED BY EVANESCENT WAVE LIGHT ILLUMINATION ........................................... 306
Yutaka Kazoe and Yohei Sato Kyoto University

FABRICATION OF NANOCANALS USING PHOTOLITHOGRAPHY AND PARTIAL ETCHING OF SACRIFICIAL LAYER ........................................... 309
Anpan Han, Gianpierrot Mondin, Nicole G. Hegelbach, Nicolaas F. de Rooij and Urs Stauffer University of Neuchâtel

ION TRANSORT THROUGH NANOSLITS INVESTIGATED BY IMPEDANCE SPECTROSCOPY .................................................. 312
Keto B Schoch¹, Stefan Metz² and Philippe Renaud¹
¹Microsystems Laboratory, STI – LMIS, EPFL, Lausanne, ²DYCONEX AG

TOWARDS FABRICATION OF SMOOTH NANOFLOWDUC CHANNELS THROUGH NIL WITH CARBON NANOTUBE STAMPS .................................. 315
Dorte Nørgaard Madsen, Theodor Nielsen, Peter Bøggild and Anders Kristensen Technical University of Denmark

8th International Conference on Miniaturized Systems for Chemistry and Life Sciences
September 26–30, 2004, Malmö, Sweden
PRESSURE-DRIVEN FLOW CONTROL AND CHEMICAL REACTION IN NANOCHANNELS

Eiichiro Tamaki¹, Akibide Hidaka¹, Haeng-Boo Kim¹, Manabu Tokeshi², Takeshi Ooi¹, Masayuki Nakao³ and Takehiko Kitamori¹,²,⁴
¹ Department of Applied Chemistry, The University of Tokyo, ² Kanagawa Academy of Science and Technology, ³ School of Engineering, The University of Tokyo, ⁴ Core Research for Evolutional Science and Technology, Japan Science and Technology Agency

SORTING AND ASSEMBLY OF SINGLE-WALLED CARBON NANOTUBES BY DIELECTROPHORESIS IN MICROLIQUID CHANNELS: A NUMERICAL STUDY

Maria Dinaki, Rene Nyberg and Peter Boggild
Technical University of Denmark

A HIGHLY SENSITIVE NANO ELECTROCHEMICAL SENSOR WITH NANO-ELECTRODES USING A DYNAMIC CHARGE PUMPING METHOD

Xiaoshan Zhu and Chong H. Ahn
University of Cincinnati

FABRICATION OF MICROLIQUID CHANNELS WITH IN-SITU GROWN INCLINED CARBON NANOTUBES

Kjell Gjerde¹, Tommy Schramm¹, Ken B.K. Teo², William M.I.² and Peter Boggild¹
¹ Technical University of Denmark, ² University of Cambridge

ARTIFICIAL LIPID BILAYERS IN A MICROFABRICATED SYSTEM

Hywel Morgan¹, Mari E. Sandison¹, Gabriel Mendes², Richard Berry² and Anthony Watts²
¹ Southampton University, ² Department of Biochemistry, ³ Department of Physics, University of Oxford

A PARALLEL ELECTRONIC SENSOR FOR PHENOTYPIC SCREENING IN DIRECTED EVOLUTION

B. Iafelice, V. Ferrarini, R. Guerrieri
ARCES – Università di Bologna

MICRO-NEWTON-RING CHROMATOGRAPHY

Hitoshi Watanabe, Masahiro Hatta and Hideaki Monjushiro
Osaka University

SHEAR FLOW SELF-ASSEMBLED GOLD NANOPARTICLE FILM FOR CHEMIRESISTOR SENSOR APPLICATIONS

Chi-Yuik Shih¹, Siyang Zheng¹, Yu-Chong Tai¹, Yi Liu¹ and J. Fraser Stoddard¹
¹ California Institute of Technology, Department of Chemistry, University of California Los Angeles
DEVELOPMENT OF A MICROFLUIDIC DEVICE USING NANO-PARTICLE-BASED BIO-BARCODES FOR ULTRA-SENSITIVE DETECTION OF PROTEINS ................................................................. 342
Edgar D. Goluek, Jwa-Min Nam, Thomas N. Chiesl, Kashion A. Shaikh,
Kee Suk Ryu, Amelise E. Barron, Chad A. Mirkin and Chang Liu
1University of Illinois at Urbana-Champaign, 2Institute for Nanotechnology and
Department of Chemistry, 3Department of Chemical and Biological Engineering,
Northwestern University

MULTICHANNEL CONTINUOUS FLOW MICROFLUIDIC SYSTEM FOR SINGLE
MOLECULE VIALS .................................................................................................. 345
Andreas John, Wyatt N. Vreeland, Michael Getin and Laurie E. Locascio
1Semiconductor Electronics Division, 2Analytical Chemistry Division, National
Institute of Standards and Technology

STUDY OF INTERFACE CONDUCTIVITY AND ITS POSSIBLE APPLICATIONS........ 348
N. J. Petersen, D. Dutta, J. P. Alarie and J. M. Ramsey
The University of North Carolina at Chapel Hill

3D CELLULAR IMPRINTING TECHNIQUE FOR FABRICATION OF BIO-
ACTUATED MICRO DEVICES .................................................................................. 351
Keisuke Morishima, Yo Tanaka, Mitsuhiro Ebara, Tatsuya Shimizu, Masayuki
Yamato, Akihiko Kikuchi, Teruo Okano and Takehiko Kitamori
1Kanagawa Academy of Science and Technology, 2,3The University of Tokyo,
3Waseda University, 4Tokyo Women's Medical University, 5CREST, Japen Science
and Technology Corporation

Monday Poster Session – Others
PARALLEL MICROFLUIDIC PROCESSING OF PROTEIN ASSEMBLY
QUANTIFIED USING SPR MICROSCOPY .................................................................. 354
Mark Blaylock, Elaine Fu and Paul Yager
University of Washington

MULTIMODE INTEGRATED OPTICAL COMPONENTS FOR µTAS –
A RIGOROUS APPROACH ....................................................................................... 357
Jörg Hüblner, Dan Zauner, Thomas A. Anhøj and Anders M. Jorgensen
Technical University of Denmark

IN VITRO MECHANICAL CELL LOADING SYSTEM FOR REGENERATIVE
MEDICINE ............................................................................................................... 360
Fumihiito Arai, Osamu Suzuki, Tomoyuki Uchida, Akihiko Ichikawa, Toshio
Fukuda, Ryutaro Kamigori, Takenobu Katagiri, Masanori Nakamura, Mamoru
Numata and Naruaki Watanabe
1Nagoya University, 2Tokyo University, 3Showa University, 4Saitama Medical
School, 5JGC Corporation
CHARACTERIZATION OF NEURAL CELLS FOR CELL SORTING USING FLOW INDUCED ELECTRICAL ADMITTANCE SPECTRA IN MICROFLUIDICS .......... 363
J. Collins\textsuperscript{1}, L. Flanagan\textsuperscript{3}, N. Jeon\textsuperscript{14}, E. Monuki\textsuperscript{3}, P.H. Schwartz\textsuperscript{1} and A.P. Lee\textsuperscript{12}
\textsuperscript{1}Department of Biomedical Engineering, \textsuperscript{2}Department of Mechanical and Aerospace Engineering, \textsuperscript{3}Department of Pathology, \textsuperscript{4}Department of Material Science and Chemical Engineering, \textsuperscript{5}Department of Developmental and Cell Biology, University of California

MILLISECOND KINETICS AND BIOCHEMICAL ASSAYS IN CHAOTICALLY MIXED DROPLET-BASED MICROFLUIDICS .......................................................... 366
Helen Song, Joshua D. Tice, Michelle R. Bringer, Cory J. Gerdts, L. Spencer Roach and Rustem F. Ismagilov
University of Chicago

A NOVEL MICROSTEP DEVICE FOR THE SIZE SEPARATION OF CELLS .................. 369
Sarah Vantrucklelsven, David Cieq, Kris Pappaert, Gino V. Baros and Gert Desmet
Vrije Universiteit Brussel

\textbf{Monday Session A – Fluid Pumping}

A HIGH FLOW RATE DC MAGNETOHYDRODYNAMIC (MHD) MICROPUMP ............ 372
Alexandra Honsy\textsuperscript{1}, Sander Koster\textsuperscript{1}, Jan C.T. Eijkel\textsuperscript{1}, Albert van den Berg\textsuperscript{2}, Elisabeth Verpoorte\textsuperscript{1} and Nico F. de Rooij\textsuperscript{1}
\textsuperscript{1}University of Twente, \textsuperscript{2}University of Groningen

FAST AND TUNABLE INTEGRATED AC ELECTROKINETIC PUMPING IN A MICROFLUIDIC LOOP ................................................................. 375
Vincent Studer\textsuperscript{2}, Anne Pépin\textsuperscript{2}, Yong Chen\textsuperscript{2} and Armond Ajdari\textsuperscript{2}
\textsuperscript{2}Laboratoire de Photonique et Nanostructures, \textsuperscript{2}Laboratoire de Physico-Chimie Théorique

FLUID ACTUATION TOWARD MICROPUMP BY CARDIOMYOCYTES ......................... 378
Yo Tanaka\textsuperscript{1}, Keisuke Morishima\textsuperscript{2}, Tatsuya Shinzui\textsuperscript{1}, Akihiko Kikuchi\textsuperscript{1}, Masayuki Yamato\textsuperscript{1}, Tetsuo Okano\textsuperscript{1} and Takehiko Kitamura\textsuperscript{12}
\textsuperscript{1} The University of Tokyo, \textsuperscript{2} Kanagawa Academy of Science and Technology, \textsuperscript{3} Tokyo Women’s Medical University

\textbf{Monday Session B – Proteomics}

FAST AND RELIABLE PROTEIN MICROARRAY PRODUCTION BY A NEW DROP-IN-DROP TECHNIQUE ........................................................................... 381
Oliver Guimann, Ruben Kuehlewein, Stefanie Reinbold, Remigius Niekwietz, Chris P. Steinert, Bas de Heij, Roland Zengerle and Martina Daub
University of Freiburg
MULTIDIMENSIONAL MICROFLUIDICS-BASED COMPREHENSIVE PROTEOME PROFILING ................................................................. 384
Jesse S. Buch1, Yan Li1, Ying-Xin Wang1, Jon W. Cooper1, Don L. DeVoe1 and Cheng S. Lee1
1 Calibrant Biosystems, 2 Department of Mechanical Engineering, and Bioengineering Program, 3 Department of Chemistry and Biochemistry, University of Maryland

ULTRASENSITIVE PROTEIN SIZING USING INTEGRATED ISOTACHOPHORESIS – GEL ELETROPHORESIS ................................................................. 387
Josh Molho, Charles Park, Kelly Price, Huan Phan, Stephane Mouradian and Michael Spaid
Caliper Life Sciences

Day 2 – Tuesday, September 28, 2004

Tuesday Session A – Cell Culture I
MULTIPLYXED MICROBIOREACTOR SYSTEM FOR HIGH-THROUGHPUT BIOPROCESS DEVELOPMENT ................................................................. 390
Nicolas Szita1, Paolo Boccazzi2, Zhiyu Zhang1, Andrea Zanzotto1, Anthony J. Sinskey2 and Klavs F. Jensen1
1Department of Chemical Engineering, 2Department of Biology, Massachusetts Institute of Technology

MICROFABRICATION OF HYDROGELS FOR THE CONSTRUCTION ANALYSIS OF CULTURED CELLULAR NETWORKS WITH CONTROLLED NETWORK SHAPES AND COMMUNITY SIZES ................................................................. 393
Hiroyuki Moriguchi, Kensuke Kojima, Ikuro Suzuki, Akio Hattori, Tomoyuki Kaneko and Kenji Yassuda
The University of Tokyo

BEHAVIOUR OF OSTEOBLAST-LIKE CELLS IN CELLULAR MICRODEVICES............. 396
E. Leclerc1, B. Davy2, R. Warocquer-Clerout1, L. Griscom2, B. Le Prouste2, T. Fujita3 and C. Leglaive1
1 Université de Technologie de Compiègne, 2 Ecole Normale Supérieure de Cachan, 3 The University of Tokyo

Tuesday Session B – Nanochannels
MICROFLUIDIC-ASSISTED LIPID NANOTUBE FORMATION AND MANIPULATION WITH LIGHT ................................................................................. 399
Laurie E. Locascio1, Ksenia Brazhnik1, Wyatt Freeland1, Rani Kishore2 and Kristian Helmerson2
1Analytical Chemistry Division, 2 Atomic Physics Division, National Institute of Standards & Technology
ELECTROKINETIC TRANSPORT AND DISPERSION IN NANOSCALE CHANNELS ................................................................. 402
Susita Pennathur and Juan G. Santiago
Stanford University

OSMOSIS AND PERVAPORATION OBSERVED IN POLYIMIDE SUB-MICRON CHANNELS ............................................. 405
Jan C.T. Eijkel, Johan G. Bomer and Albert van den Berg
University of Twente

**Tuesday Session A – Particles**

CONTROLLED PRODUCTION OF FUNCTIONAL POLYMERIC MICROSPHERES USING MULTI-PHASE MICROFLUIDICS ............................................................................................................. 408
Takahiro Nishimura, Toru Torii and Toshiro Hisaguchi
The University of Tokyo

MICROFLUIDICS FOR COLLOIDS PROCESSING ........................................................................................................... 411
Saif A. Khan¹, Axel Gänßer², Franz Trachsel³, Martin A. Schmidt¹ and Klaus F. Jensen¹
¹Department of Chemical Engineering, ²Microsystems Technology Laboratories, Massachusetts Institute of Technology

PINCHED FLOW FRACTIONATION FOR RAPID AND CONTINUOUS PARTICLE SEPARATION IN MICROFLUIDIC DEVICES ........................................................................................................... 414
Masumi Yamada¹, Megumi Nakashima¹, Yuushi Sai², Masahiro Yasuda² and Minoru Seki²
¹The University of Tokyo, ²Osaka Prefecture University

**Tuesday Session B – Optical Detection**

MICROFLUIDIC CONTROL OF OPTICAL PATHS ........................................................................................................... 417
K. Ono¹,², T. Shirai², S. Kamedo² and T. Fujii²
¹Enplas Laboratories, Inc., ²Institute of Industrial Science, The University of Tokyo, ³Arbitec Ltd., The University of Tokyo

ON THE TEMPORAL EVOLUTION OF MICRO-DISCHARGE SPECTRA AND DETECTION OF ORGANIC VAPORS IN AIR ........................................................................................................... 420
Bhaskar Mitra and Yogesh B. Gianchandani
University of Michigan

OPTICAL EMISSION SPECTROMETER OF AQUEOUS SOLUTION SAMPLES EMPLOYING LIQUID ELECTRODE PLASMA ........................................................................................................... 423
Akiko Ishikawa, Yasutaka Morita, Eiichi Tamiya and Yasuru Takehara
Japan Advanced Institute of Science and Technology
Tuesday Plenary IV
ECIS: A BIOSENSOR BASED ON ELECTRICAL MEASUREMENTS.......................... 426
Ivar Giaever
Rensselaer Polytechnic Institute and Applied BioPhysics Inc.

Tuesday Poster Session – Applications II
ENZYMATIC ACTIVITY MEASUREMENT AT HIGH TEMPERATURE BY
MOMENTARY HEATING WITH ON-CHIP MICRO HEATER........................................ 427
Hideyuki Arata¹, Y. Rondelez², G. Tressel², S. Takeuchi³, H. Noji¹ and H. Fujita¹
¹ The University of Tokyo, ²LIMMS-CNRS/IN2S

IN SITU FORCE PROBING FOR CARDIAC MYOCYTE USING PDMS FILLAR
ARRAY .................................................................................................................. 430
Yi Zhao and Xin Zhang
Boston University

SILICON BASED µ-IMMGBILISED ENZYME REACTORS (µMER) CONTAINING
CELLULOSE HYDROLYSING ENZYMES ................................................................. 433
Claes Melander¹, Dane Mencelovic², Carina Nilsson¹, Martin Bengtsson¹, Thomas
Laurell² and Lo Gorton¹
¹Department of Analytical Chemistry, ²Division of Technical Analytical Chemistry,
³Department of Electrical Measurements, Lund University

INTEGRATING ASSAY STEPS ON A MINIATURIZED PLATFORM: FROM
PCR TO HYBRIDIZATION .................................................................................. 436
Rolf M. Kaack, Ste‡anie Reinbold, Roland Zengerle and Martina Daub
IMTEK, University of Freiburg

A NOVEL MICRO DEVICE FOR MEASURING THE ELECTROMECHANICAL
PROPERTIES OF A SINGLE MYOCYTE .............................................................. 439
M. A. Hassam¹, N. Fajiwara², I. Kanno³, K. Koteras⁴ and H. Washizu³
¹ Kyoto University and Assiut University, Egypt, ²Kyoto University, ³The University
of Tokyo

DNA AMPLIFICATION AND DETECTION DEVICE USING ELECTROSTATIC
MICRODROPLET MANIPULATION TECHNIQUE .............................................. 442
Lay Kuan Goh, Masaya Tokoro, Toru Torii and Toshiro Higuchi
The University of Tokyo

MICRO REACTORS FOR THE OPTIMISATION OF REACTION CONDITIONS IN
ASYMMETRIC METAL CATALYSIS ..................................................................... 445
Stina Lundgren¹, Aman Russom¹, Christina Jansson¹, Göran Stemme², Stephen J
Haswell¹, Helene Andersson² and Christina Moberg³
¹KTH Chemistry, Stockholm, ²KTH S3, ³University of Hull
SINGLE CELL ANALYSIS BY FORMATION OF AIR-LIQUID BOUNDARY ........................................ 448
Akihiko Ichikawa1, Fumihito Arai2, Toshio Fukuda1 and Tokoru Katsuragi2
1 Nagoya University, 2 Nara Institute of Science and Technology

SIMULTANEOUS MEASUREMENT OF MOVEMENT AND GROWTH OF SWIMMING CELLS USING ON-CHIP SINGLE-CELL CULTIVATION ASSAY ........................................... 451
Akihiro Hattori1, 2, Senkei Umehara1, Yuichi Wakanoto1 and Kenji Yasuda1
1 The University of Tokyo, 2 Japan Science and Technology Agency

QUANTITATIVE EXTRACTION OF Al³⁺ IN WATER USING DISPERSED DROPLET IN T-SHAPED MICROCHANNEL ........................................................................................................... 454
Momoko Kumemura and Takashi Korenaga
Tokyo Metropolitan University

SPACE- AND TEMPORAL-CONTROLLED ELECTROORGANIC SYNTHESIS WITH GLASS ELECTROCHEMICAL MICROCHIP .................................................................................. 457
Naoki Sasaki1, Takehiko Kitamori1, 2 and Haeng-Boo Kim1
1 Department of Applied Chemistry, The University of Tokyo, 2 Kanagawa Academy of Science and Technology, 3 Engineering Research Institute, The University of Tokyo

MICROCHIP FLOW CYTOMETER WITH INTEGRATED POLYMER OPTICS FOR FLUORESCENCE ANALYSIS OF CELLS ........................................................................................................ 460
Zhenru Wang, Jörg P. Kutter and Anders Wolff
Technical University of Denmark

RAPID POLYMERASE CHAIN REACTION IN POLYMERIC MICROCHIPS DRIVEN BY FERROFLUIDS ......................................................................................................................... 463
K.S. Dres1, G. Münchow1, D. Dadic1, F. Dofing1, S. Ilardi1, O. Sörensen1, T. Müller1 and A. Klein-Vehme2
1 Institut für Mikrotechnik Mainz, 2 Evotec Technologies, Düsseldorf

PROTEIN MICROCHIP BIOASSAY WITH DUAL FLUORESCENT- AND MALDI READ-OUT ................................................................................................................................. 466
David Finnskog1, Anton Ressine1, Thomas Laurell1 and György Marko-Varga2
1 Department of Electrical Measurements, 2 Department of Analytical Chemistry, Lund University

A METHOD FOR EXTREMELY RAPID REACTION OPTIMISATION USING A CONTINUOUS FLOW MICROREACTOR WITH ON-LINE RAMAN SPECTROMETRY ..................................................................................................................... 459
Shee-Ann Leung, Richard F. Whible, Robert C.R. Woolton and Andrew J. de Mello
Imperial College London
SUZUKI-COUPING REACTION USING IMMOBILIZED CATALYST MEMBRANE MICROCHIP

Masaharu Ueno, Shinta Moriya, Hideaki Hisamoto, Takeshi Nakai, Yasuhiro Uozumi and Takehiko Kitamori

1 The University of Tokyo, 2 Kanagawa Academy of Science and Technology, 3 Institute for Molecular Science and The Graduate University for Advanced Studies, Okazaki

MEDIATED AMPEROMETRIC ASSESSMENT OF ENZYME ACTIVITY IN LIVING S. CEREOVISIAE CELLS IMMobilIZED ON PLATINUM MICRO-BAND ELECTRODE CHIP

Arto Heiskanen, Christa Spégel, Julia Yakovleva, Ted Johanson, Milena Koudelka-Hep, Bärbel Hahn-Hägerdal, Jenny Ennès and Tautgirdas Rugas

1 Department of Analytical Chemistry, 2 Department of Applied Microbiology, Lund University, 3 Université de Neuchâtel

A PDMS MEMBRANE BASED MICROREACTOR FOR PERFUSED PRIMARY RAT HEPATOCYTE CULTURES

Serge Ostrovidov, Jianjian Jiang, Yasuyuki Sakai and Teruo Fujii

1 LIMMS/CNRS-INS, Institute of Industrial Science, 2 Institute of Industrial Science, 3 Center for Disease Biology and Integrative Medicine, The University of Tokyo

DEVELOPMENT OF A BIOASSAY SYSTEM RETAINING FLOATING CELLS AND ITS APPLICATION TO THE ANTI-ALLERGIC DRUGS

Takahito Tokuyama, Shin-ichiro Fujii, Kōichi Sato, Mitsuru Abo and Akira Okubo

The University of Tokyo

SEPARATION OF BLOOD CELLS AND PLASMA IN MICROCHANNEL BEND STRUCTURES

C. Blatter, R. Jurisciaka, I. Tabhan, A. Schoth, P. Kerth and W. Menz

1 University of Freiburg, 2 PREVENTOR μTBC

MONITORING STEM CELL GROWTH USING A MICROELECTRODE ARRAY

Pontus Linderoth, Michel Brouard, Yann Barrandon, and Philippe Renaud

1 Laboratory of Microsystems, 2 Laboratory of Stem Cell Dynamics, Swiss Federal Institute of Technology

MINIATURIZED MEASUREMENT SYSTEM FOR LOW AMMONIA CONCENTRATIONS

University of Twente

PROTEOMICS IN MICROFABRICATED DEVICES

Richard B.M. Schasfoort, Stefan Schlaudt, Geer A. J. Besselink and Anna J. Tudos

University of Twente
TUNEABLE RESOLUTION ON A CAPILLARY ELECTROPHORESIS CHIP ................. 494
Alexander Iles1,2 and Andreas Manz1
1ISAS, Dortmund, 2Current address: NIMS, Tsukuba

MEASURING THE INSERTION OF MICROFABRICATED MICRONEEDLES INTO SKIN WITH A PENETRATION SENSOR ................................................................. 497
P.W.H. Loeters1, R.F. Dauw1, F.J. Verbaan2, R. Lutg2, D.J. van den Berg2, J.A.
Bouwstra3 and A. van den Berg1
1University of Twente, 2Leiden/Amsterdam Center for Drug Research

SHEATHLESS MICROFLUIDIC CYTOMETER WITH ASYMMETRIC MICRONOZZLE FOR ABSOLUTE COUNTING OF BLOOD CELLS ........................................... 500
Junha Park1,2, Seonghwan Kim1, Jung Kyung Kim1, Seok Chung1, Keunchang Cho3,
Chani Chung1, Dong-Chul Han1 and Jee Keun Chang1,3
1School of Mechanical and Aerospace Engineering, 2School of Electrical Engineering and Computer Sciences, Seoul National University, 3Digital Bio Technology, Co., Seoul

SAMPLING FOR POINT-OF-CARE ANALYSIS OF LITHIUM IN WHOLE BLOOD WITH CHIP BASED CE ................................................................. 503
Elwin Vroome, Regina Lutg and Albert van den Berg
University of Twente

DRY POWDER MIXING WITHOUT RESTRICTIONS IN COMPOSITION ............... 506
Torsten Vilhner1 and Andreas Manz2
1Imperial College London, 2ISAS - Institute for Analytical Sciences, Dortmund

SELECTIVE MAGNETIC BEAD CAPTURE USING AN ADDRESSABLE ON-CHIP ELECTROMAGNET ARRAY .............................................................. 509
Kristian Smistrup1, Ole Hansen1, Peter T. Tang2 and Mikkel F. Hansen1
1Department of Micro and Nanotechnology, 2Department of Manufacturing Engineering and Management, Technical University of Denmark

MICRO IMMUNO SUPPORTED LIQUID MEMBRANE (µ-ILM) EXTRACTION ........... 512
Madalina Tudorache1, Jan Norberg2 and Jenny Ennérus1
1Lund University, 2Personal Chemistry, Uppsala

ESSENTIAL COMPONENTS IN AN INTEGRATED PLATFORM FOR ON-SITE SCREENING OF ANABOLIC ANDROGENIC STEROIDS IN BIOLOGICAL SAMPLES ................................................................. 515
Sara Thorst Lund1, Sara Bergström2, Nina Johansson2, Andreas Petersson1, Gustav Liljegren1, Kristina Magnusson1, Mathias Hallberg1, Oliver Klett1, Jonas Bergquist1, Leif Nyholm1, Karin Markides1, Fred Nyberg1 and Fredrik Nikolajeff1
1Department of Engineering Sciences, 2Department of Chemistry, 1Department of Pharmaceutical Biosciences, 1Department of Materials Chemistry, Uppsala University
FIXED VOLUME 384 CHANNEL NANOLITER DISPENSER FOR HIGHLY PARALLEL AND SIMULTANEOUS LIQUID TRANSFER INTO WELL PLATES .......... 518
Reinhard Steger, Benjamin Bohl, Chris Steinert Roland Zengerle and Peter Kolty
University of Freiburg

A SILICON-BASED MULTI-PATCH DEVICE: APPLICATION FOR IONIC CURRENTS SENSING ON SINGLE CELLS ...................................................... 521
T. Sordel1, S. Garnier-Raveaud4, F. Sauver1, C. Pudd1, A. Picollet-D’hahan1 and P. Chatelain1
1CEA Grenoble, Life Science Division, 2CEA Grenoble, LETI

DEVELOPMENT OF THREE-DIMENSIONAL PASSIVE MICROMIXER AND ITS APPLICATION FOR MINIATURIZED DNA PREPARATION SYSTEM ........................................ 524
Naeyeon Lee1, Masayuki Yamada1 and Minoru Seki2
1The University of Tokyo, 2Osaka Prefecture University

ON-A-CHIP GENOTOXICITY ASSAY-APPLICATION TO HIGH-THROUGHPUT SCREENING BIOCHIPS ................................................................. 527
R. Piron1, N. Rougetier2, R. Vaudry3, A. Corot4, E. Glais4, P. Joly4 and B. Le Picoule4
1Biomis-SATIE, Bruz, 2Bioprestic, Rennes, 3INSERM-U522, Rennes, 4CEA-LETI, Grenoble

USE OF MAGNETIC NANOPARTICLES FOR DNA ANALYSIS AND PROTEIN DIGESTION IN LAB ON CHIPS ........................................................................... 530
Nicolas Minc1, Marek Sojakova1, Kevin D. Dorfman1, Blaize Bokwa1, Zuzana Bilkova1, Claire Smaida1, Claus Futterer1, Myriam Tavernier1 and Jean-Louis Viovy1
1Institut Curie, 2University of Pardubice, 3Université Paris

MICROSYSTEMS SURFACE TREATMENT AND DNA AMPLIFICATION TO DETECT CAMPYLOBACTER spp. USING A MICROFABRICATED SU-8 PCR CHIP ................................................................................................. 533
Troels Balmer Christensen1, Dang Duong Bang2, Ivan R. Perch-Nielsen1, Zhenyu Wang1 and Anders Wolff1
1Technical University of Denmark, 2Danish Institute for Food and Veterinary Research

MICROREACTOR BASED ON ENZYME IMMOBILIZED CARBON NANOTUBE .......... 536
JeongYun Kim1, Duk-Juong Kim1, HyukHan Kim1 and SangGoon Lee1
1Department of Biomedical Engineering, 2Department of Chemistry, Dankook University

MICROFLUIDIC MIXERS FOR UV STUDIES OF UNLABELED PROTEINS ......................... 539
David Herzog2, Juan Santiago1 and Olga Grubaj1
1Stanford University, 2Lawrence Livermore National Laboratory

MONITORING PROTEOLYTIC ACTIVITY IN DROPLET MICROARRAYS, A NEW TOOL FOR DRUG DISCOVERY AND DIAGNOSTIC ................................................. 542
L. Meherli, F. Chatelain and M. Balakirev
Laboratoire Biopuces, Grenoble
Tuesday Poster Session – Microfluidics II

RAID PROTOTYPING OF PDMS MICROCHANNELS USING A LIQUID CRYSTAL PROJECTOR-MODIFIED MASKLESS PHOTOPOLYMERIZATION DEVICE

Jun Kobayashi¹,², Masayuki Yamato¹,², Kazuyoshi Ito¹,², Akihiko Kikuchi¹,² and Teruo Okano¹,²
¹ Tokyo Women’s Medical University, ² CREST, Japan Science and Technology Agency

MICROCHIP CAPILLARY ELECTROPHORESIS DEVICE WITH ON-LINE MICRODIALYSIS SAMPLING FOR NEAR REAL-TIME MONITORING

Bryan Hyun¹, Barbara Fogarty¹, Scott Martin¹ and Susan Lunte¹
¹ University of Kansas, ² Saint Louis University

DROPLET MANIPULATION USING SAW ACTUATION FOR INTEGRATED MICROFLUIDICS

Alan Renaudin, Victor Zang, Pierre Tabourin, Jean-Christophe Camari and Christian Dion
Institut d’Electronique de Microélectronique et de Nanotechnologie

CENTRIFUGAL PLATFORM FOR HIGH-THROUGHPUT REACTIVE MICROMIXING

University of Freiburg

CAPILLARITY-RESTRICTED MODIFICATION METHOD FOR GAS/LIQUID SEPARATION AND GAS BUBBLE PURGE IN MICROCHANNELS

Akihide Higara¹,²,³, Shinobu Inagawa¹, Masaharu Ueno¹,²,³, Yoshikuni Kitakan¹,²,³, Manabu Tokeshi¹,² and Takehiko Kitamori¹,²,³
¹ The University of Tokyo, ² Kanagawa Academy of Science and Technology, ³ CREST, Japan Science and Technology Agency

MULTI-CHANNEL MICROFLUIDIC IMMUNOASSAY CHIP USING PROTEIN MICROARRAY FORMED BY ELECTROSPRAY DEPOSITION METHOD

Yuutaka Yamagata¹,², Akihiko Tajima², Bum-Hwan Lee², Teruyuki Nagamura², Takahito Yamamoto², Teruo Fujii³, Kozo Inoue³ and Hitoshi Ohmori³
¹ Materials Fabrication Laboratory, RIKEN, ² Department of Chemistry and Biotechnology, ³ Institute of Industrial Science, The University of Tokyo, ³ Fucence Co., Ltd

APOPTOSIS INDUCED KINETIC CHANGES IN AUTOFLUORESCENCE OF HL60 CELLS – APPLICATION FOR SINGLE CELL ANALYSIS ON CHIP

Floor Wolbers¹,², Ana Valero³, Helene Andersson¹, Regina Lutte³, Istvan Vermes³ and Albert van den Berg¹
¹ University of Twente, ² Medisch Spectrum Twente

CONTINUOUS CENTRIFUGAL SEPARATION OF WHOLE BLOOD ON A DISK

Thilo Brenner, Stefan Haekerle, Roland Zengerle and Jens Ducrée
IMTEK – Institute of Microsystems Technology, Freiburg
UNSTEADY ELECTROKINETIC PHENOMENA DURING ELECTROELUTION FROM CLINICAL SAMPLING STRIPS ........................................ 569
Sun Min Kim and E. F. Hasselbrink Jr.
University of Michigan

MINIMIZATION OF PERFORMANCE VARIATION IN MICROFLUIDIC COMPONENTS USING THE METHOD OF ROBUST DESIGN .................................................. 572
Lennart Bitsch, Henrik Bruus and Jörg P. Kutter
1 Novo Nordisk Denmark 2 Technical University of Denmark

PARTICLE IMAGE VELOCIOMETRY AND NUMERIC SIMULATIONS FOR AN IMPROVED UNDERSTANDING OF THE STAGGERED HERRINGBONE MIXER STRUCTURE ........................................................................ 575
A. Wolff, H. Klank, H. Bruus, J. P. Kutter, F. Okkels and O. Kuhn
1 Technical University of Denmark, 2 Dantec Dynamics

LIQUID DROPLET DYE LASER .................................................................................................................. 578
Hatim Azzouz, Søren Balslev and Anders Kristensen
Technical University of Denmark

HANDLING DROPLETS IN 3 DIMENSIONS FOR LAB-ON-CHIP APPLICATIONS .......... 581
Jean-Maxime Rolin, Yves Fouillet and Jean-Luc Achar
1 Laboratoire d’Electronique et de Technologie de l’Information, Grenoble, 2 Laboratoire des Ecoulements Gréphysiques et Industriels, Grenoble

THERMAL CONTROL OF AQUEOUS FLUIDICS IN MICROCHANNELS GRAFTED WITH THERMORESPONSIVE POLYMER ............................................................................ 584
Naokazu Idota, Akihiko Kishita, Jun Kobayashi, Kiyotaka Sakai and Teruo Okano
1 Waseda University, 2 Tokyo Women’s Medical University, 3 CREST, Japan Science and Technology Agency

MAGNETIC SEPARATION IN MICROSYSTEMS: EFFECTS OF HYDRODYNAMIC INTERACTION .................................................................................................................. 587
Christian Mikkelsen, Mikkel Foug Hansen and Henrik Bruus
Technical University of Denmark

ELECTROKINETIC MICROPUMPS FOR DIRECT PUMPING OF ACIDIC SOLVENTS IN MICRO-HPLC SYSTEMS ........................................................................ 590
Kamlesh Patel and Robert Crocker
Sandia National Laboratories

MAGNETOHYDRODYNAMIC MICROMIXING FOR CENTRIFUGAL LAB-ON-A-DISK PLATFORMS .......................................................................................................................... 593
Markus Grumann, Andreas Geipel, Lutz Riegger, Roland Zengerle and Jens Ducrée
IMTEK - University of Freiburg

8th International Conference on Miniaturized Systems for Chemistry and Life Sciences
September 26–30, 2004, Malmö, Sweden

xxxvi
ANALYTICAL MODELS FOR COMPLEX ELECTROKINETIC PASSIVE MICROMIXERS .................................................. 596
Yi Wang, Qiao Lin and Tamal Mukherjee
1Department of Mechanical Engineering, 2Department of Electrical & Computer Engineering, Carnegie Mellon University

FLOW BEHAVIOR NEAR AN ADVANCING INTERFACE WITH SINGLE- AND TWO-COMPONENT LIQUIDS IN MICROCHANNEL ................................................................. 599
Naoki Ichikawa and Rystaro Maeda
National Institute of Advanced Industrial Science and Technology

EFFECT OF MICROCHANNEL GEOMETRY ON CELL PROLIFERATION: EXPERIMENTS AND INTERPRETATION
Hongmei Yu, Irina A. Shkel and Dave J. Beebe
1Department of Biomedical Engineering, 2 Department of Chemistry, University of Wisconsin - Madison

MICROPUMP FOR RECIRCULATION OF INSECT CELLS IN SUSPENSION .................. 605
Javier Atencia, Hongmei Yu and David J Beebe
University of Wisconsin – Madison

INTEGRATED AND RECONFIGURABLE VALVES AND PUMPS USING BRAILLE DISPLAYS .................................................................................................................. 608
Wei Gu, Xiaoyue Zhu, Nobuyuki Futai, Brenda S. Cho and Shuichi Takeyama
University of Michigan

ANALYSIS OF A SURFACE-MICROMACHINED PERISTALTIC PUMP ...................... 611
Qiao Lin, Bazi Yang, Jun Xie and Yu-Chong Tai
1Carnegie Mellon University, 2 California Institute of Technology

NOVEL PARTICLE SEPARATION USING SPIRAL CHANNEL AND CENTRIFUGAL FORCE FOR PLASMA PREPARATION FROM WHOLE BLOOD ................................................................. 614
Ji Yoon Kang, Hansang Cho, Seung Min Kwak, Dae Sung Yoo and Tae Song Kim
Korea Institute of Science and Technology

ELECTROHYDRODYNAMIC STABILITY OF TWO-PHASE MICROFLOWS ............... 617
Goran Goromovici, Mads P. Sorensen, Morton Broers and Henrik Bruus
1MIC - Department of Micro and Nanotechnology, 2Department of Mathematics, Technical University of Denmark

LABCD-96®: A MINIATURED CENTRIFUGAL MICROFLUIDIC SYSTEM FOR BIOCHEMICAL ASSAYS ........................................................................................................ 620
Eric A. Schilling, Bruce L. Carvalho, Praveen Bansal and Michael Contarino
1Tecan Bostest, Inc., 2Living MicroSystems, Inc., Boston
CONVECTIVE ELECTROKINETIC FLOW INSTABILITIES IN A CROSS-SHAPED MICROCHANNEL .......................................................... 623
Jonathan D. Posner, Hao Lin, and Juan G. Santiago
Stanford University

NUMERICAL AND EXPERIMENTAL INVESTIGATION OF BUBBLE PINCH-OFF IN THE FLOW-FOCUSING DEVICE .......................................................... 626
Mads J. Jensen1,2, Piotr Garauskis1, Michael Fuerstman2, Henrik Braus, George M. Whitesides3, and Howard A. Stone3
1 Technical University of Denmark, 2 Department Chemistry and Chemical Biology, 3 DEAS, Harvard University

INFLUENCE OF NONUNIFORM CHANNEL WIDTH DISTRIBUTION IN POROUS SILICON HIGH ASPECT RATIO PARALLEL CHANNEL MICRO REACTORS ............... 629
Martin Bengtsson, Mikael Nilsson and Thomas Laurell
Lund University

CHARACTERISATION OF THE FLOW BEHAVIOUR IN MICROREACTORS BY MEANS OF RESIDENCE TIME DISTRIBUTION MEASUREMENTS .................................... 632
D. Boškovic, K. Huber and S. Löbbeke
Fraunhofer-Institut Chemische Technologie ICT

GAS-LIQUID TWO-PHASE FLOW PATTERNS IN POLYMERIC MICROFLUIDIC CHANNELS WITH DIFFERENT SURFACE CHEMISTRIES ........................................ 635
Dongeun Huh, Alan H. Tlaczylk, James B. Grantberg and Shuichi Takayama
University of Michigan

A FULLY POLYMER-BASED SACRIFICIAL LAYER, CROSS-FLOW FILTER WITH 100 NM CUT-OFF SIZE .......................................................... 638
Jan Lichtenberg and Henry Baltes
ETH Zurich

TRANSIENT MICROFLUIDIC VELOCITY MEASUREMENT AND PARTICLE CHARACTERIZATION WITH A LASER SCANNING CONFOCAL MICROSCOPE ............. 641
Shih-hui Chao, Mark R. Hill, John H. Koschwanez, Robert H. Carlson and Deirdre R. Meldrum
University of Washington

PRECISE AND AUTOMATED MICROFLUIDIC SAMPLE PREPARATION ........................................ 644
Bruce P. Mosier, Robert W. Crocker, Cindy K. Hornett and Kamlesh D. Patel
Sandia National Laboratories

CELL ENCAPSULATION ON A MICROFLUIDIC PLATFORM .......................................................... 647
Jeffrey S. Fisher1 and Abraham P. Lee1,2
1 Department of Biomedical Engineering, 2 Department of Mechanical Engineering, University of California Irvine
A PERFORMANCE COMPARISON OF POST- AND RIDGE-BASED DIELECTROPHORETIC PARTICLE SORTERS ................................................................. 650
Rafael V. Davalos, Blanca H. Lapizco-Encinas, Gregory J. Fiechtnner, Anup K. Singh, Blake A. Simmons, Yolanda Finschenko and Eric B. Cummings
Sandia National Laboratories

RECONFIGURABLE MICROFLUIDIC WAVEGUIDES FOR ON-CHIP FLOW CYTOMETRY .......................................................................................... 653
Tor Vestad, Matt Brown, John Oakey and David W.M. Marr
Colorado School of Mines

A HIGH DENSITY MICROFLUIDIC MICROARRAY PLATFORM FOR RAPID GENOMIC PROFILING .................................................................. 656
Jay A.D. West, Kyle W. Hukari, Timothy Shepodd and Gary A. Hux
Sandia National Laboratories

QUANTITATIVE ANALYSIS OF MOLECULAR TRAP EMPLOYING ELECTRIC AND HYDRO DRAG FORCE FIELD ........................................... 659
Yuichi Tomizawa¹, Kosji Yuki¹, Yasutaka Morita¹, Eichi Tamiya² and Yuzuru Takamura¹,²
¹ Japan Advanced Institute of Science and Technology (JAIST), ² PRESTO JST

BINARY VALVING OF PARTICLES USING ACOUSTIC FORCES ................................................. 662
Meller Sundin, Andreas Nilsson, Filip Petersson and Thomas Learell
Lund Institute of Technology

NUMERICAL MODELLING OF MICRO-DROPLET FORMATION ..................................................... 665
Daniel Lörstad¹, Thomas Learell² and Johan Nilsson²
¹ Department of Heat & Power Engineering, ² Department of Electrical Measurements, Lund University

AUTHOR INDEX .................................................................................................................. 668

KEY WORD INDEX ............................................................................................................ 677
